

Steps for a Data Cycle....can be used for any data cycle!

Step 1

Collect and Chart your data

Sample Data Chart

Elmer's White School Glue

| sample | test 1 | test 2 | test 3 | test 4 | Average Distance, cm |
|--------|--------|--------|--------|--------|----------------------|
| #1 | 10 | 12 | 15 | 18 | 13.75 |
| #2 | 15 | 18 | 20 | 22 | 18.75 |
| #3 | 20 | 22 | 25 | 28 | 23.75 |
| #4 | 25 | 28 | 30 | 32 | 28.75 |

Step 2

Analyze to prioritize student needs

over the assessments or student work, looking for strengths and errors

Step 3

Set a SMART goal

The percentage of _____ (student group) scoring proficient or higher in _____

(content area) will increase from _____ (current % proficient or higher)

to _____ (goal %) by the end of _____ (month, unit, quarter) as measured by _____

(assessment tool) administered on _____ (specific date).

Step 4

Select strategies for areas of concern or misconceptions

Step 5

What are the result indicators? What will you see if strategies are working and are being successful to move students learning?

Step 6

Monitor...how is it working?

The Data Team Process – Process Placemat for a data team looking at data on a standard/s

| 1st | First Ever Meeting | Establish norms, understand the purpose of the data meeting, understand the 5 steps | | | | | | | | | | | | | | | |
|---|--|---|--|---|---|---|---|-------------------------------|--|--|--|--|---------------------------------|----------------------|------------------------------|-----------------------------------|---|
| 2nd | Before Instruction and the DT cycle | Select your standard, Create or select pre-assessment, determine the criteria/rubric for the 4 performance groups (Proficient, Close, Far but likely, Intervention), administer, score | | | | | | | | | | | | | | | |
| 3rd Before Instr Collab on these 5 steps. | 1. | <p>Collect and chart data</p> <table border="1"> <thead> <tr> <th>Tcher</th> <th>#</th> <th>%</th> <th>#</th> <th>%</th> </tr> </thead> <tbody> <tr> <td> </td> <td> </td> <td> </td> <td> </td> <td> </td> </tr> </tbody> </table> | Tcher | # | % | # | % | | | | | | | | | | |
| | Tcher | # | % | # | % | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | | | |
| | 2. | <p>Analyze strengths and obstacles (Performance Errors and Misconceptions)</p> | <p>Identify the strengths and needs of student performance and then form inferences based on the data. Teams also prioritize by focusing on the most urgent needs of the learners. Include analysis for:</p> <p>Students Proficient of Higher- Strengths and Inferences/Next Steps and Inferences Students Close to Proficient- Strengths and Inferences/Obstacles-Errors and Inferences Students Far to Go-Strengths and Inferences/Obstacles-Errors and Inferences Intervention Students-Strengths and Inferences/Obstacles-Errors and Inferences</p> | | | | | | | | | | | | | | |
| | 3. | <p>Establish goals: set, review, revise</p> | <p>Teams collaboratively set incremental goals. These short-term goals are reviewed and revised throughout the data cycle.</p> <p>The percentage of _____ (student group) scoring proficient or higher in _____ (content area) will increase from _____ (current % proficient or higher) to _____ (goal %) by the end of _____ (month, unit, quarter) as measured by _____ (assessment tool) administered on _____ (specific date).</p> | | | | | | | | | | | | | | |
| 4. | <p>Select common instructional strategies</p> | <p>Teams collaboratively identify research-based instructional strategies. The determination is based on the analysis in step 2.</p> <table border="1"> <thead> <tr> <th colspan="5">Consider strategies for each performance group and/or misconceptions</th> </tr> <tr> <th colspan="5">Consider the components below</th> </tr> </thead> <tbody> <tr> <td>Selected Instructional Strategy</td> <td>Learning Environment</td> <td>Time- frequency and duration</td> <td>Materials for Teachers & Students</td> <td>Assign. & Assessmts Where will stud be required to use the strategy?</td> </tr> </tbody> </table> | Consider strategies for each performance group and/or misconceptions | | | | | Consider the components below | | | | | Selected Instructional Strategy | Learning Environment | Time- frequency and duration | Materials for Teachers & Students | Assign. & Assessmts Where will stud be required to use the strategy? |
| Consider strategies for each performance group and/or misconceptions | | | | | | | | | | | | | | | | | |
| Consider the components below | | | | | | | | | | | | | | | | | |
| Selected Instructional Strategy | Learning Environment | Time- frequency and duration | Materials for Teachers & Students | Assign. & Assessmts Where will stud be required to use the strategy? | | | | | | | | | | | | | |
| 5. | <p>Determine results indicators</p> | <p>Teams create descriptors of successful strategy implementation as well as improvements to be seen in ongoing student work that would indicate the effectiveness of the selected strategies. For each strategy-write result indicators for Adult Behaviors, Student Behaviors, and what you will see in Student Work.</p> | | | | | | | | | | | | | | | |
| Alternate Mt. | Between Meeting 3 and 4 | <p>Monitor and Evaluate: Discuss strategies: are they working or not Bring student work to show evidence of strategies working or not Share and model the strategies for fidelity Begin to create next pre-assessments</p> | | | | | | | | | | | | | | | |
| 4th-After Instr Collab | Review post-assessment data | <p>Step 6 is Monitor and Evaluate Results If goal was met, create or select next pre-assessment, Start Cycle Again!</p> | | | | | | | | | | | | | | | |
